

LOOK New Product

The **E-Solar** control system has been specifically designed with the environment in mind.

A unique and convenient system that uses the energy from the sun to drive the operation of the shutter up and down.

*In the case of insufficient sunlight the controller can be charged using the 240v E-Charger.*

**OZRoll is pleased to announce the ALL NEW E-Solar control system**

**Consider the advantages of the ALL NEW E-Solar system.**

- Environmentally Friendly
- Simple Installation
- Stand Alone System
- Save on the costs of an electrician
- Remote Control Function
- Small, efficient & light-weight panel
- Battery/controller located inside the home

***Ozroll's E-Solar System is the future of roller shutter automation!***

**SERIES**  
BY OZROLL  
POWERED BY THE SUN!

Compatible with our existing Ozroll Drive System (ODS)

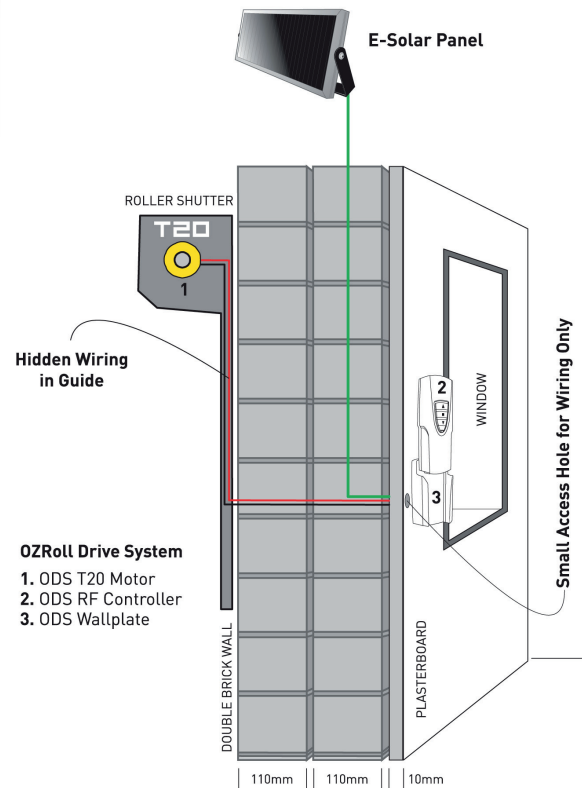

## ODS & RF Contol Options

Ozroll supplies the E-Solar System to be compatible with our standard E-port and RF Controllers.
